

Quynh Huong Lai

Research engineer – Biochemistry and Bioinformatics

✉ Quynh-Huong.LAI@univ-cotedazur.fr  Quynh Huong Lai
 Quynh Huong Lai  <https://laihuong.github.io/>
 0761889741

WORK EXPERIENCE

09/2026 - present  **Clinical data management training** in Absilon

Clinical Data Management & Validation, EDC & Database Management, Data Cleaning & Query Management, Data Quality Control, CDISC (CDASH, SDTM), Medical Coding, GCP & Regulatory Compliance, Clinical Data Documentation, Ennov, eCRF

2022 - 09/2026  **Research engineer** in IRCAN Nice

Thesis title: *Coevolution and functional diversification of the TRF2-Apollo interaction in jawed vertebrates*
Designed and Optimized experimental protocols .

Analyzed data using Python;

Scientific reports, publications, technical documentation, Collaborated with multidisciplinary teams, Training team

2021 - 2022  **Engineer** in IRCAN Nice

Title: *COvid-19 Severity and Telomeres project (COST)*

Performed molecular biology experiments, data analysis

2020 - 2021  **Master Internship** in Institut polytechnique de Paris (Ile de France)

Title: *Role of DNA bending in EndoMS/NucS function* Biochemical and molecular biology experiments
Performed protein-DNA interaction assays and structural analysis by Python.

2019 - 2020  **Master Internship** in Institut de biologie structurale (Grenoble)

Title: *Development of new inhibitor of human parainfluenza virus*

Protein purification, biochemical assays, and inhibitor screening

EDUCATION

2022 - Present  **Ph.D in Life Science** in Universite Cote d'Azur

2020-2021  **M.Sc. Molecular Biology and Computational Biology** in École Polytechnique de Paris.

2018-2020  **M.Sc. Biochemistry and Bioinformatic** in ENS Paris Saclay (France)/ Complutense University of Madrid (Spain) .

2015-2018  **BSc** in University of Science and Technology of Hanoi (Vietnam)
Pharmacology, Medicine, and Bioinformatic .

SKILLS

Languages	 English(Fluent), French(professional working proficiency), Vietnamese
Clinical Data manager	 Ennov,SAS,SQL,eCRF,Data Validation, Data Cleaning, Query Management, CDISC, SDTM,GCP
Bio-informatics	 Python (Pandas, Biopython), R (DESeq2, ggplot2), NGS data analysis (FastQC, RNA-seq / DNA-seq analysis), ChIP-seq, Differential expression (DESeq2)), Linux, BLAST, Git, Pymol, Chimera, Jalview, Hyphy, Galaxy.
Cell biology techniques	 Protein purification, PCR / RT-PCR / qPCR, Transient transfection, Knock-down (siRNA/shRNA), Lentiviral transduction, Immunofluorescence staining and confocal microscopy, Image analysis (ImageJ/Fiji), Western blotting, Co-IP
